Midland Communications Assists Small to Mid-Sized Companies Facing the Challenges of the Recession with an Innovative Technology Buy Back Program

Current Technology Assurance Plan's (C-TAP) Buy Back Option is Gaining in Popularity Due to the Economic Slowdown

DAVENPORT, IA — May 29, 2008 — Midland Communications, an industry leader in business communications, announced today that the company is assisting the region's small to mid-sized companies facing the challenges of the recession with an innovative technology buy back program that's becoming increasingly popular. Midland Communications has generated greater awareness to the company's Current Technology Assurance Plan's (C-TAP) Buy Back Option. This unique program enables Midland Communications to offer cash back to a customer for their existing communications system. By taking advantage of this valuable opportunity, companies will enjoy all of C-TAP's benefits, while reinvesting the money they receive from Midland Communications and their strategic partner GreatAmerica Leasing Corporation back into their business where they need it most to weather the current economic environment.

"Talk to almost any business owner and they will tell you that they're preparing for the worst," said Jason Smith, sales manager of Midland Communications. "We're offering a tremendous program that will put cash back into the hands of these businesses so they can continue to grow regardless of the economy. Plus, they will reap all of the advantages that C-TAP has to offer."

Since its inception in 2005, C-TAP has become the telecommunication industry's most innovative program. C-TAP ensures that the technology and

information systems of small to mid-sized companies remain current. C-TAP encourages companies to incorporate the latest in technology through refresh that begins in 24 months without a change in their fixed monthly payment. In addition, new equipment and applications are installed without labor charges. Technology can be added as needed within a fixed cost that can be absorbed by an organization's operating budget.

When companies originally bought for a cash price opt for the Buy Back Option they automatically become a part of C-TAP. The age of the system will determine the amount of cash back they will receive from Midland Communications. When the transaction occurs, the customer makes monthly payments reversing the original outlay for system's large capital investment. In order to qualify for the Buy Back Program, Midland Communications' customers will need to meet specific criteria including credit approval from GreatAmerica.

Companies that take advantage of the C-TAP program will immediately receive an array of benefits including unlimited in-house moves and changes, unlimited remote programming, routine software upgrades, call accounting analysis, storage system and backup, priority queuing for adds, moves, changes, a guarantee of inventory on hand, preferred maintenance, and periodic replacement of handset and station cords. C-TAP also provides businesses with professional services such as unlimited training, annual audit of connectivity charges, and annual preventative maintenance visits.

"Technology has to do two things in order for any business to embrace it," added Mr. Smith. "One is to increase

profitability the other is to give a competitive advantage. This is even more prevalent during times of a recession. C-TAP essentially gives companies the freedom to manage their capital wisely now and moving into the future, while not having to worry about losing competitive advantages because they're utilizing antiquated technology."

ABOUT MIDLAND COMMUNICATIONS

Midland Communications began more than 60 years ago in 1946 as the Worldwide Marketing Arm of Victor-Animagraph Projectors. In 1977 a communications division was formed due to a partnership with NEC America. Today, As a distributor of NEC America, for 33 years, Midland Communications has a customer base of more than 3,000 satisfied customers that include general businesses, government agencies, Universities, colleges, hospitals, and hotels.

Midland provides a wide range of communication services including VOIP, PBX and key systems, Wide Area and Local Area networking, computers, Computer integration, voice mail, CCIS, and video conferencing and paging systems.
